## Addendum No. 1

**Date:** May 24, 2018  
**City Project:** 17-22B, “RFP for Construction Management Services for North Valley Regional Recycled Water Program – Turlock Component”

Plan holders:

1. A site visit of the Turlock’s Harding Drain Bypass Pump Station and the City of Modesto’s effluent pump station and pipeline tie in point at the Jennings Ranch will be available for interested proposers on Thursday, May 31<sup>st</sup> beginning at 8:15 AM. Attendance is optional. The site visit will commence at the Harding Drain Bypass Pump Station located at the southeast corner of S. Prairie Flower Road and Harding Road at 8:15 AM on Thursday May 31<sup>st</sup>. The site visit at the Modesto Jennings Road WWTP will begin thereafter at 9:00 AM. Interested bidders should enter the Jennings Road facility at the main entrance off of Jennings Road and check in at the operations center to check in. City of Modesto staff will then show you to the effluent pump station and pipeline tie-in point. Please be prompt in arriving at the Harding pump station at 8:15 AM and the Jennings facility operations center at 9:00 AM. If you are interested in attending, please send me a number of individuals to expect so that I may coordinate with City of Modesto staff.

**2. Page 2, “Background,” paragraph 2 shall be amended to read:**

The North Valley Regional Recycled Water Program’s (NVRWP) objective is to convey recycled water treated by the cities of Modesto and Turlock to the Delta Mendota Canal (DMC) for use by the Del Puerto Water District. Construction of the Modesto component of the program has recently been completed and includes the construction of a pump station at the Jennings Road Wastewater Treatment Plant and a pipeline from the new pump station to the DMC. The City of Turlock currently discharges recycled water to the San Joaquin River by way of a pressurized pipeline which conveys recycled water to a concrete standpipe structure located west of the intersection of Harding Road and South Carpenter Road, where it overflows a weir and flows by gravity to a river outfall structure located south of the standpipe and west of the levee. The NVRWP Turlock Component includes the construction of a pipeline and related appurtenances to connect to the Modesto Component upstream at a blind flange installed just south of the newly constructed effluent pump station located at the ~~of the concrete standpipe to the~~ City of Modesto’s Jennings Road Wastewater Treatment Plant. The pipeline will be constructed in Stanislaus County right of way for South Carpenter Road and West Main Avenue, in the City of Modesto’s right of way on Jennings Road, and within a

permanent easement that the City of Turlock has obtained within the Jennings Ranch property adjacent to the Modesto's Jennings Road Wastewater Treatment Plant.

**3. Page 11, "Experience" bullet under the proposal qualifications statements, shall be amended to read as follows:**

- Experience – Describe the experience of the firm. Specifically note experience as construction manager in the following areas:
  - ~~Wastewater treatment construction and expansion projects~~ Pipeline projects
  - Teaming with the owner, engineer, and contractor
  - Maintaining cooperative atmosphere and attitude with contractor
  - Coordinating between the contractor and plant operators regarding shut down constraints
  - Construction general permit
  - Regulatory agencies
  - Timely contract close out

If you have any questions, please call me at (209) 668-5417 or email at sfremming@turlock.ca.us.

Sincerely,

Stephen Fremming, P.E.  
Senior Civil Engineer
