#### **SUPERVISOR COMMENTS**

This July 4th turned out to be a very day for swing shift. During the day, officers responded to a shoplifting at a northern retail store. The suspects fled prior to TPD arrived, but a license plate was obtained and follow-up will be conducted. Officers responded to a death of a resident. She suffered from several medical conditions and was found by her family, who came to visit her. No foul play was evident. As the night progressed, we received numerous fireworks violations. As the firework calls mounted, we were able to utilize our UAS, responding to the locations TPD received calls about. This was extremely helpful. Within 1 hour of flight time, TPD issued approximately 7 different fireworks violations. All observed by the UAS. This does not include the violations that were handled by officers without the use of the UAS. It was also used to follow several suspects who fled from TPD units. The UAS pilot was able to give clear directions of travel and descriptions of the suspects. All were eventually detained without incident. Also during this shift, officers assisted the fire department as they responded to several structure and grass fires.
